Dual focus in Computer Science & Business  
University of Puget Sound, Tacoma, WA

## Accomplishments

- **Rank of Eagle, January 2001**  
Boy Scouts of America, Walnut Creek, CA
- **NWEN Member, November 2005 to Present**  
Northwest Entrepreneur Network, Bellevue, WA

## Professional Experience

### Web Application Developer

SiteCrafting, Inc.

September 2007 - Present

- Built large scale web applications for clients from various industries. Products were built in a LAMP environment (PHP, MySQL, JavaScript).
- Managed projects end-to-end: working with the client to establish project scope and components, coordinating with our design team, developing the promised product, managing timelines and milestones, coordinating QA testing and fielding post-development feedback and requests.
- Built internal tools to aid in the company's transition away from third-party offerings, including: a bug tracker, a design-review tool for clients to view and approve proposed designs, a cron manager/scheduler, and a task list/timesheet logger.
- Established and implemented coding standards and best practices company-wide (including reference documentation distributed to every developer).
- Pioneered a developer training program, aiding in developers' understanding of advanced language features and programming techniques.

### Software Developer

Customer Feedback, LLC

August 2006 - September 2007

- Was a primary developer for the company's proprietary Java EE based business intelligence system, CSIS.
- In charge of all Crystal Reports related aspects of CSIS (report design, API integration, folder structure, user accounts/permissions, etc.).
- Developed Flash / ActionScript based client applications for use within CSIS.

### Freelance Web Developer

Progressive Design Studios, LLC

November 2005 - August 2006

- Developed websites and web applications for clients using PHP, XHTML, JavaScript, and MySQL database backends.
- Managed multiple projects simultaneously, offering a wide range of services including business identities (logos, business cards, etc.), basic websites, and advanced web applications.
- Maintained financial accounts, performed licensing and registration tasks, communicated with clients, and developed marketing strategies.

### Desktop Technical Support Intern

Russell Investments

January 2002 - May 2002

- Prepared and configured newly received desktops and notebooks for distribution to employees.
- Provided on-call desktop technical support to local employees.
- Utilized software inventory software to manage employee software profiles.
